# Postscript

Hi! My dear friends in Taiwan. I'm Tony. In Japan, I mainly create illustrations for PC and PlayStation2 games.

"Graph" which I just produced is a collection of my works collected as one book, and I hope people in Taiwan will enjoy the contents.

I have participated since 3 years ago in the exhibition and sale of fanzine named "Comic Market" held twice a year in summer/winter here in Japan. I first attended the event based on the title "RACINAROK ONLINE" (RO) which was released in two issues entitled "Kaburimon" (Headwear).

In this book "Graph" I have also included some illustrations from my previous works. Actually, I wanted to put on more illustrations, but some of the illustrations may be somewhat suggestive..(?) But like as here in Japan, I understand RO is popular in Taiwan, too. I hope there will be an opportunity for me to write another book for RO for you.

FYI, I use Hunter and Priest as main characters of playing in RO. And, Archemist of level 83 completely no separated skill.

Umm? You ask me why not separated skill to Archemist? Of course, I'm waiting for mounting "Homunculus" in RO. But I've been waiting for about a year and a half or maybe more..

I look forward to seeing you soon again while still continuing to wait for mounting "Homunculus" in RO, due to all!

Feb. 20th 2005

Tony
